profile

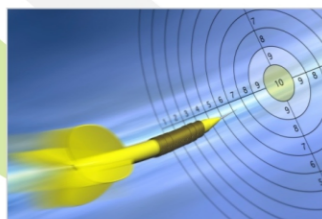

Company

Fine Foods Industries is a manufacturer and exporter of dehydrated onion, garlic and other vegetables in flake, minced, granule and chopped forms. The company is located at Mahuva, Gujarat, a town located in India's second largest onion producing belt. The company leverages the latest technology innovations to ensure that the products are prepared in hygienic conditions and conform to international quality standards. They have installed an Automatic Sortex Machine as part of their efforts towards quality enhancement.

### Vision

The availability of high quality processed food in the market is our vision. In an age when processed food products are in great demand, one of the ways to ensure quality is by using superior quality ingredients. We aim to realize our vision by producing dehydrated products from fresh onion and other vegetables, in hygienic conditions.

### Mission

Our mission is to be a prominent producer of quality dehydrated onion and other vegetable products in the global market. Towards achieving this objective, we aim to add to our product range and enhance our production capacity by establishing more plants, and adopting state of the art technology.

### Quality Control

Fine Foods Industries is well established with laboratory containing modern equipment which is run by qualified professional, who are regularly testing raw sample as well as dehydrated products. Sample are collected for inspection at regular interval during the production process in order to maintain good quality standards.
